## EMBEDDED ARM CORE FRONT PANEL SOLUTIONS

ARM Cores  
DDR RAM  
EMMC/SDHC  
10/100 ENET  
USB OTG Host  
USB Device  
RS232/RS485  
SPI/I2C/PWM  
Digital/Analog  
PID Control  
PT100/PT1000  
Thermocouples  
Modbus RTU  
Linux/iDevOS  
MPCT Touch  
IP65 Bezels

Are you looking for a UK source with in-house capability to support your hardware design and software coding needs?

Our UK design and manufacturing centre has been supplying standard and custom front panel display solutions to European industrial, vending and medical users for 20+ years.

Our MPCT (Metallised Projective Capacitive Touch) can offer fast and high sensitivity for a range of industries.

Please check out our website and contact us soon.

## Helmet certified to EN397 & EN12492 has integrated eye protection

Combining the new retractable eyewear helmet technology with the Dualswitch chinstrap harness system, wearers can switch between working at ground level standard EN397 and working at height safety standard EN12492 by flicking a switch.

At the same time, the EVO<sup>®</sup>VISTA Dualswitch helmet provides individuals with compatible integrated Optical class 1 eye protection which is fully retractable when not in use and cannot be lost by the user or damaged on site after issue. Wearers can wear their own spectacles under the lens or shield, saving additional costs to companies for prescription safety eyewear.

The EVO<sup>®</sup>VISTA Dualswitch helmet offers the choice of either a VISTAlens or VISTAshield, depending on the levels of protection and performance required. The EVO<sup>®</sup>VISTAlens Dualswitch Optical class 1 overspec has an unobstructed wide view lens conforming to EN166.1.FT.KN,

providing F rated impact protection - tested with 6mm steel ball bearing at speeds of up to 100mph (160kph) - even at extreme temperatures with anti-scratch and anti-mist coatings.

The EVO<sup>®</sup>VISTAshield Dualswitch Optical class 1 eyeshield offers a clear panoramic view conforming to EN166.1.AT.KN, providing A rated impact protection - tested with 6mm steel ball bearing at speeds of up to 425mph (685kph) - even at extremes of temperature with anti-scratch and anti-mist coatings.

The EVO<sup>®</sup>VISTA Dualswitch range has been designed to be fully compatible with JSP respirators, such as the Forcee PressToCheck and the Sonis<sup>®</sup> helmet-mounted ear defender range

## LABTEX<sup>®</sup>

Labtex supplies leading laboratory products including HUBER liquid temperature control systems, DIEHM glass reaction systems to 100 litres,

PREMEX and AMAR high pressure autoclaves, POPE wiped film or short path evaporators and distillation systems, Nutsche filter dryers,

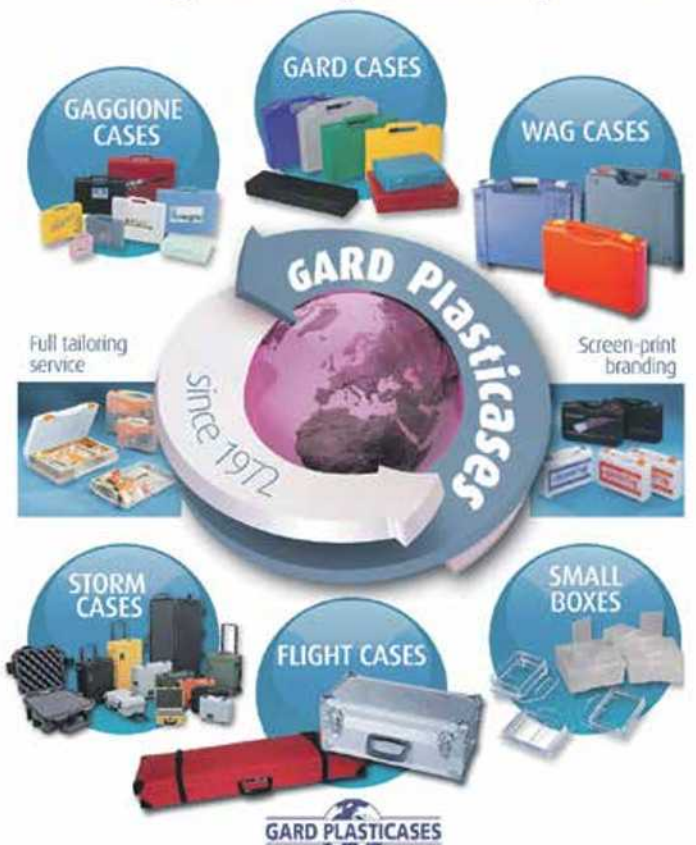

BOLA labware in PTFE and other technical plastics, Vacubrand vacuum pumps, ASECOS storage solutions for hazardous materials to BS EN 14470-1 and SICCO desiccators.

We also work with LLG Germany, the 3rd largest lab supplies distributor in Europe and have a catalogue of 20,000 items from over 200 respected brands.

For further details contact Labtex on 01484 600200 or visit [www.labtex.co.uk](http://www.labtex.co.uk) to see the range.
